Message From the Minister

Whether harvested from the sea or produced through aquaculture, Prince Edward Island seafood products are renowned for their distinctive flavour and high quality. The export of fish products accounts for more than 35 per cent of the province's shipments to international markets, so I can confidently say that Prince Edward Island seafood products are enjoyed around the world.

The seafood processing industry has long been an important component of the economy of Prince Edward Island. In 2003, more than 140 million pounds of marine resources were harvested with the landed value in excess of $165 million. The industry has expanded in recent years. Seafood products are processed in the most modern processing facilities and the value of fish product shipments has increased significantly. However, one thing has remained the same, that is the proud Island tradition of offering only the best in seafood products, produced in a quality environment and harvested and processed with care.

I am pleased to present this Seafood Products Directory. With alphabetic listings of seafood plants, information on the wide array of products processed, and detailed contact information, I am sure you will find the directory to be a valuable reference guide. If you require further information on Prince Edward Island seafood products, please do not hesitate to contact the Department of Agriculture, Fisheries, Aquaculture and Forestry or PEI Business Development Inc.

Sincerely,

Honourable Kevin MacAdam
Minister
